Fullstack Software Engineer

WORK EXPERIENCE

Rithm School • Remote • 05/2023 – 07/2024

Software Engineer and Teaching Assistant

- Provided instructional support for a class of 12 to 20 fullstack software engineering students for 16 weeks, focusing on JavaScript, TypeScript, React, Python, Django, API development, and SQL and gave 15 hours of written and verbal code review per week
- Served as project manager for 8 to 10 students each cohort, managing 3 agile sprints and reviewing PRs encompassing 4,000 lines of Django code
- Contributed to an 81,000-line Django codebase for our white-labeled student management system, including maintaining 99% testing coverage

Great Leap Studios • Remote • 08/2020 – 02/2023

Web Developer and Digital Marketing Specialist

- Developed and maintained 50 WordPress websites with HTML, CSS, and JS, including decreasing load times by 50% for improved SEO
- Managed Linux server and cloud hosting for 30 websites with 99.5% uptime across sites

Betterment • Denver, CO, USA • 02/2020 – 08/2020

Banking Services Associate

- Resolved 65+ customer tickets per day via phone and email through Zendesk to help users with technical and product issues with a 93% satisfaction rate

The Cleveland Orchestra • Cleveland, OH, USA • 01/2019 – 01/2020

Development Database Coordinator

- Managed CRM database with over 100,000 users, including leading a sanitization project to standardize records and reduce reporting time by 30%
- Implemented software solutions and created custom dashboards to provide data visualization and metrics to support a \$33 million fundraising operation

Broadway Sacramento • Sacramento, CA • 01/2016 – 12/2019

Annual Giving Coordinator • Full-time

- Served as CRM super-user and Development department database administrator for a 2,500-person donor base, including department reporting
- Automated data entry to reduce gift processing time by 90%, postal costs by 50%, and reconciliation time by 80%

VOLUNTEERING & LEADERSHIP

Interconnected Collective • 03/2024 – Present

Software Engineer • Remote

Website

Collaborate with a team of developers and UX/UI designers to transform Figma mock-ups into a responsive React website for Interconnected Collective, host of the unofficial Lesbians Who Tech conference bingo game. Refactored previously written code to improve maintainability, documentation, and site accessibility and speed.

PROJECTS

Jobify

Full stack Indeed-clone built with React, Node.js, Express, PostgreSQL, and a RESTful API

Github – Demo

- Created authentication and authorization system for backend API routes with JWTs to manage app access for different user roles
- Used test driven development to design a backend with 100% testing coverage
